

## Press Release

Japan Automatic Machine Co., Ltd. (J.A.M.) and ESSEBI Automation S.R.L. (ESSEBI) have agreed a Global Technology and Supply Partnership.

The Partnership will result in a global offering of machines and industrial automation solutions for the wire processing industry.

As a result of the Technological Partnership, customers of both companies will have access to a wide portfolio of existing and new product solutions, and benefit from the shared technological experience and know-how of both companies and their subsidiaries i.e., all its group companies in case of J.A.M and Samec Macchine in case of ESSEBI.

As a result of the Supply Partnership, customers will have access to local technical service representation, and also to on-time delivery of critical parts. The Supply Partnership will offer customers a worldwide coverage of products and services. Both companies have the future intention to extend this Supply Partnership with a Production Partnership in Europe and Asia, in line with customer requirements as a result of the changing global supply dynamics following the COVID-19 pandemic.

ESSEBI and J.A.M. are looking forward to increasing their value-add offer to their customers through this Partnership.

ESSEBI, founded in 2007 and headquartered in Brendola (VI), Italy is a systems integrator that designs, builds and implements on-site industrial automation solutions where robotics play an essential role. Essebi's automation philosophy is based on the seamless integration of man-machine. The company has two manufacturing locations in Vicenza province of Italy.
